## EDUCATION

2020 - Today ORT Braude

- B.Sc. Software Engineering student
- Current GPA 86.17

High School

- The Hebrew Reali school of Haifa:  
Graduated in 2015

## LANGUAGES

English: fluent.  
Hebrew: native tongue.

## ABOUT ME

- I am a software engineer student in my 6th semester. I am a technology enthusiastic, quick learner and love to work as part of teams.
- Passionate about programming, Always want to learn and improve my skills.

## WORK EXPERIENCE

### DevOps Engineer

Intel 2022 - Today

- Responsible for building, deploying, maintain and automating software development pipeline from source control through production utilizing Azure cloud platform in both unix and windows environment.

## PROJECTS

- Build a secured linux production web server on a mini pc from scratch, including networking configurations.
- Manage my own CI/CD pipelines in Jenkins to facilitate and automate the release process for my own applications.
- Designed and implemented CEMS (College Examination Management System) to streamline and enhance test management processes. Enabled efficient test creation, administration, grading, and statistical analysis, improving overall educational efficiency.
- Developed a dynamic web application with integrated database functionality, featuring user sessions and secure login. The platform empowers users to access and visualize stock charts, while also offering the ability to personalize by adding preferred stocks to a favorites list.
- Deploy my own portfolio website from my linux server using docker container

## SKILLS

- Python
- Docker
- Ansible
- Linux
- Networking
- Jenkins
- Prometheus & Grafana
- Elastic Stack
- Azure
- Kubernetes
